PROFILE

A highly motivated Information Systems fresh graduate with a dual passion for developing user-centric web applications and analyzing data to drive solutions. My core specialization is in full-stack web development, an expertise solidified through the MBKM Front-End and Back-End program, where I honed my ability to build responsive websites with a strong UI/UX focus. Complementing my technical skills, I possess practical experience in data analysis and management, including data entry and processing. I am an excellent communicator and a highly adaptable team player, able to quickly integrate into new work environments. I thrive in collaborative settings and have a natural curiosity that drives me to constantly discover and learn new things.

KEY SKILLS & COMPETENCES

Software : Tableau, Google Colaboratory, Microsoft Office, Google Workspace, Power BI, Visual Studio Code

Skillset : Public Speaking, Leadership, Analytical Thinking, Problem Solving, Data Visualization, Business Understanding, Story Telling, Project Management, Communicative.

EDUCATION

Gunadarma University

September 2021 – September 2025

Bachelor of Information Systems – GPA: 3.76/ 4.00

Dicoding Indonesia

February 2024 – June 2024

(MSIB) Pengembang Front-End Web dan Back-End

PROFESSIONAL & ORGANIZATION EXPERIENCE

Al Ma'ruf festival, Al Ma'ruf Islamic Senior High School

August 2019 – August 2020

Volunteer – Logistics & Equipment Division

- Responsible for the procurement, inventory management, and distribution of all event equipment.
- Ensured all technical equipment (sound systems, projectors) functioned optimally throughout the event.
- Collaborated with other divisions to meet their logistical and technical needs.
- Managed inventory and ensured all assets were returned in good condition post-event.

PROJECTS

TEAMS

- **2024: Final Project Front-End dan Back-End (Dicoding Indonesia) (3 People)**

As a core team member, I contributed to the design and development of an interactive digital library platform aimed at increasing children's interest in reading. My responsibilities included implementing a user authentication system (registration and login) to provide a personalized experience, and developing the platform's main feature: a digital book catalog equipped with categorization and a search system for

easy navigation. Furthermore, I designed and developed a responsive, kid-friendly user interface (UI) to ensure an optimal user experience (UX) across various devices. Throughout the project, I actively collaborated with the team using version control systems like Git to maintain an efficient development workflow.

- **2024: Luqman-Kost (Gunadarma University) (4 People)**

As a core team member, I contributed to the design and development of a boarding house listing platform (Website Kost) aimed at simplifying the accommodation search process. My responsibilities included implementing a user authentication system (registration and login) to provide a personalized experience, and developing the platform's main feature: a comprehensive room catalog equipped with filtering capabilities (e.g., price, location) and a search system for easy navigation. Furthermore, I designed and developed a responsive, intuitive user interface (UI) to ensure an optimal user experience (UX) across various devices. Throughout the project, I actively collaborated with the team using version control systems like Git to maintain an efficient development workflow.

INDIVIDUAL

- **2024: Laptop Price (Part of assignment of Lembaga Sertifikasi Profesi Gunadarma)**

I created a project to help a person in determining what decision to consider in buying a laptop, visualization using public tableau and data processing using Google Colab
